Great Interest for Si ATM at ATC Global 2011

Following a tradition of 15 years, Si ATM was present also at this year's ATC Global 2011 – the largest fair within the ATM business. This year, Si ATM had prepared a new design of their stand allowing them to present new products. It proved to be a success. Visitors showed a distinct increase in interest for Si ATM, both as a company and for their products.

ATC Global offers opportunities to monitor industry trends and to network with industry colleagues. In order to facilitate this, Si ATM's stand hosted many old friends, allowing for discussions covering previous and current engagements. Given the importance these guests have for Si ATM, we truly hope they felt welcome during their visits. ATC Global provides possibilities to create new bonds and Si ATM representatives had the pleasure of acquainting new industry colleagues. We are looking forward to remain in contact and to progress with our plans for joint ventures in the future.

Si ATM has already started planning for next year's exhibition and is looking forward to welcome all their guests once again.

About Si ATM

Si ATM AB is an Air Traffic Management System Integration company with 30 years of experience in installation of operational systems and simulators to Air Navigation Service Providers, Training Institutes, and other aviation organisations throughout the world.

Si ATM is located in Sundbyberg, which is close to Stockholm in Sweden. The company has specialised in development of highly advanced technology for Tower, Approach, and Area Control Centres, integrated into variety of other systems.

The company's main achievements are the maintenance of the Moscow ACC operating system, which went operational in 1981. State of the art technology based on Eurocontrol requirements has been implemented in 1996 in Riga, Latvia, and in 2004 in Bahrain, Middle East.

Si ATM is known for its high quality and low risk integration of ATM systems. Flexibility and low cost maintenance solutions distinguish the company in the competitive market of Air Traffic Management.
