## Jakarta Research and Demonstration Centre Upgrade

In March 2011 the Research and Demonstration Centre installed in Jakarta, Indonesia, was upgraded with new hardware and software. Aim of the platform is to demonstrate the functionality and feasibility of the Si ATM ATC system in an Indonesian Airspace Environment.

The Research and Demonstration Centre in Jakarta is one step for Si ATM in the process to engage deeper into Asian markets.

## About Si ATM

Si ATM AB is an Air Traffic Management System Integration company with 30 years of experience in installation of operational systems and simulators to Air Navigation Service Providers, Training Institutes, and other aviation organisations throughout the world.

Si ATM is located in Sundbyberg, which is close to Stockholm in Sweden. The company has specialised in development of highly advanced technology for Tower, Approach, and Area Control Centres, integrated into variety of other systems.

The company's main achievements are the maintenance of the Moscow ACC operating system, which went operational in 1981. State of the art technology based on Eurocontrol requirements has been implemented in 1996 in Riga, Latvia, and in 2004 in Bahrain, Middle East.

Si ATM is known for its high quality and low risk integration of ATM systems. Flexibility and low cost maintenance solutions distinguish the company in the competitive market of Air Traffic Management.
